BLOKPAX

Blokpax CryptoPunk 1859 Giveaway

(Yes, one lucky wallet will win this Punk to celebrate our 1 Year Anniversary).

We have created 2,500 chances to win CryptoPunk #1859 via a free mint.

Even if you don't win the Punk, all entries become "Blokpax First Editions" trading card NFTs of different rarities.

The First Editions will also have one more surprise utility to come after the Punk is awarded.

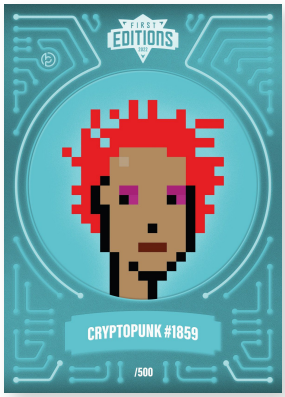

Distribution:

- 250 entries (tokens 0-249) pulled in the Blokpax Summer Elite Drop.
- 2,250 entries available through a free mint. We are using Premint.xyz with mint allocation to various communities to complete the allow list.

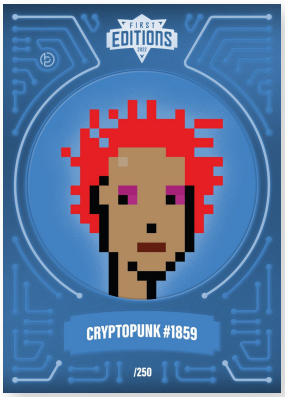

How the game works:

Roughly 72 hours after the mint closes, 1600 NFTs will be revealed as "common" trading cards. They will get the "common" background design and they will live forever as a collectible Punk Trading Card *(the first officially licensed trading card of its kind fwiw.)*

The next round will reveal 500 more of the NFT cards as "Aqua Tier Parallels." Although eliminated from winning the Punk, these are now more limited blockchain collectibles that live forever on Ethereum. Those that don't reveal as Aqua Parallels win this round, and are now in the rarified air of the final 400 left standing. **They are even more valuable now as they move closer to the big prize.**

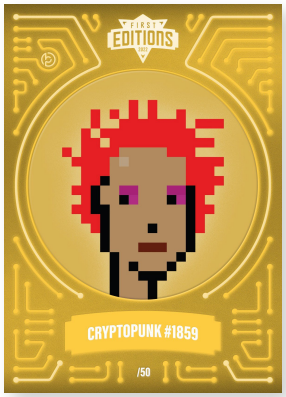

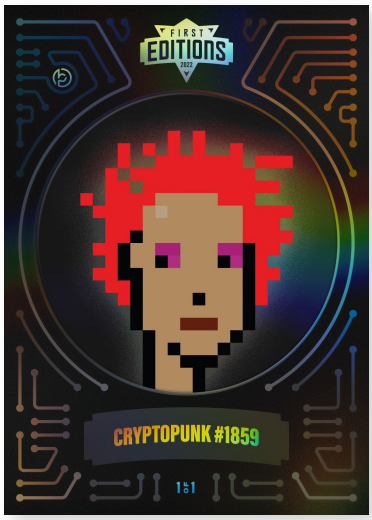

Next, we reveal 250 Blue parallels. Same process. They are eliminated but are even more rare collectibles. The 150 left standing are really making things interesting now. It's now a race to the finish.

Now… It's time for 99 Red Parallels to reveal. The winners of this round are in the final 51!!! The Red Parallels are very rare collectibles.

Lastly, it's time to crown our BIG winner. Of the 51 NFTs remaining, 50 of them will become Gold Parallels.

Leaving 1 winner standing as the **1/1 Black Hologram holder.** The holder of the 1/1 Black Hologram will be airdropped the punk.

Very Important Gameplay Mechanic:

Tokens 0-249 were randomly inserted into packs from our 2022 Summer Elite Drop and they have some special powers. These specific token numbers are guaranteed to be Blue parallels or better. So, if you want to guarantee yourself of being in the Blue round or higher, and don't already have one, these are tokens to chase. The right to hold one of these tokens came from the rip of over 60,000 digital packs. So they were hard to find and their bye in the first two rounds of eliminations was well earned!

Also Important to Know:

The fate of these entries is NOT pre-determined. An on chain random decides which entries eliminate EACH round (using Chainlink). Tokens 0-249 will not be eligible for elimination until the "Blue Round" as noted but, once we reach that round, these tokens lose their special power and the random treats them the same as all other entries.
